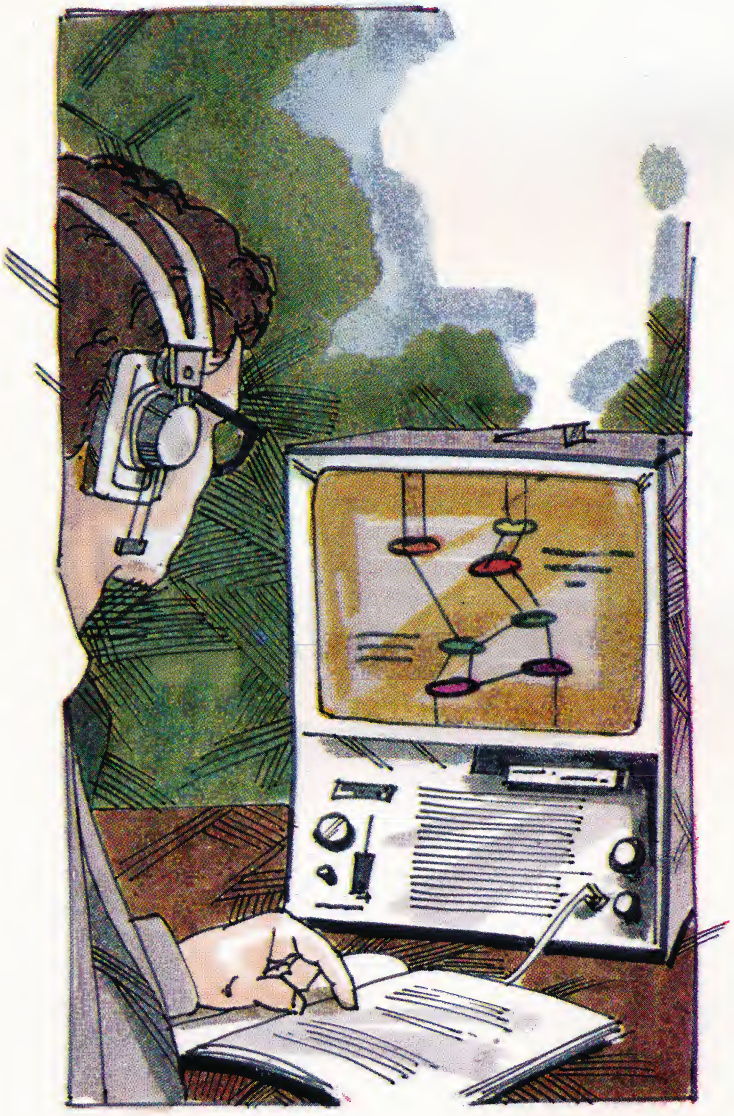
THE EDUTRONICS SYSTEM

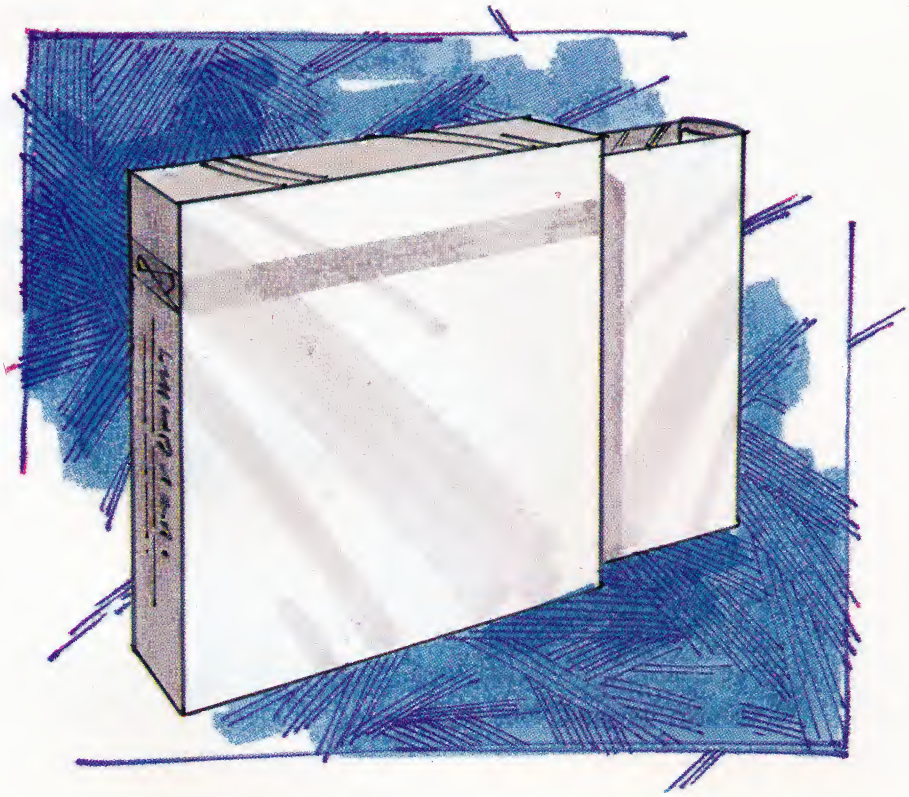


Film Lessons

The Films present information about specific data processing subjects. Animated and live-action in sound and color, the films average five to seven minutes in length. They may be used either by an individual or in a classroom environment.

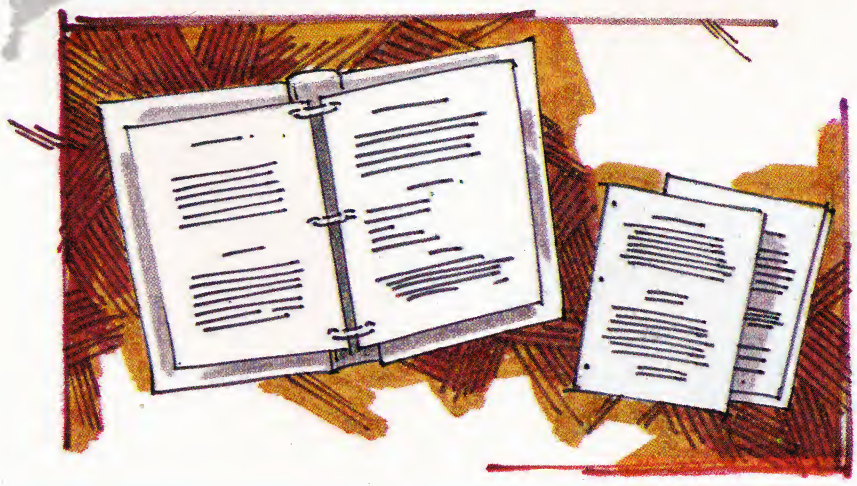
The Edutronics System is a total education system designed to solve the problem of in-house education/training of data processing professionals. The System is composed of the following...

Film Lessons
System Guides
Workbooks/Viewer's Guides



System Guides

The System Guides contain the basic instructional tools needed to use the film-related material. You will appreciate the many features which make each System Guide easy to use and adaptable to individual classroom situations.



THE EDUTRONICS SYSTEM

Workbooks/Viewer's Guides

The Workbooks/Viewer's Guides—for each lesson, designed to reinforce learning—test the amount of knowledge gained, and apply the information from the films to practical, everyday problems.
